WORK EXPERIENCE

2016-01-01 TILL TODAY

Director of Software Engineering at [Waitr](#):

Led the growth of product and engineering during a period of 3300% growth for Waitr.

- Led the growth and mentoring of a 4 person engineering team to a 20 person cross functional product and engineering team.

- Built two self sustaining cross functional scrum teams that work in synchronized 2 week sprints.

- Oversaw the transition from two 2 legacy PHP services to a distributed microservice architecture built on node.js

- Managed the SDLC process for 7 products in a hyperlocal on-demand multisided marketplace with 500K consumers, 3000 suppliers, and 2500 logistics providers.

2011-12-01 TILL 2015-12-31

Sr. Software Engineer at [Upwork](#):

First Growth Engineer at Elance. Built the original Elance Private Talent Cloud (PTC) offering and transitioned it to Upwork Enterprise.

- First growth engineer at Elance working on building SEO Content Trees, optimizing conversion funnels and building A/B tests.

- First enterprise engineer that grew to a team of 3. Built 7 enterprise tools used by large enterprises to speed up the hiring and onboarding of freelancers.

- Frontend enterprise lead for the migration and rebranding of Elance Private Talent Cloud to UpWork Enterprise.

- Mentored 5 engineers, handled release management and all devops responsibilities for frontend and middle layer.

2008-12-01 TILL 2011-12-31

Web and Mobile Software Engineer at [Kfx2 Baton Rouge, LA:](#)

Web developer turned mobile developer who launched a mobile services division.

Managed security and PCI compliance for 19 co-located servers and key accounts such as Texas Roadhouse.

Completed 20+ redesigns and new launches of sites for clients.

Led the creation of a mobile development services department where we created 5 native iOS applications for new and existing clients.
